| REF 310127 | White, 12 Units | REF 310257 | White, 36 Units |
| REF 310128 | Contrast, 12 Units | REF 310258 | Contrast, 36 Units |

Storage: Refrigeration may be used to extend shelf life. Return to room temperature before use.

Indications for use:

For dentin replacement and buildup under prefabricated crowns and bridges

1. Prepare the tooth:

- Remove all decay and old restorative material.
- Any eugenol present must be rinsed away with ethanol before proceeding.

2. Etch the tooth:

- Attach needle to syringe and express with a slow, steady pressure.
- Apply Onyx™ 40% phosphoric acid etching gel to enamel first, then dentin.
- Wait 10 seconds, then rinse with water and dry gently.

3. Apply bonding agent:

- Any agent compatible with self-cure composites.

4. Build up core:

- Insert RapidCore Mini-Mix cartridge into any C-R® Syringe and remove cap.
- Attach mixing nozzle to the cartridge.
- Purge a small amount from the tip to assure proper mixing and flow.
- Inject the material into the prep, keeping the needle embedded in the material to reduce the chance of voids, fill from the bottom up. Working time is approximately 60 seconds.

5. Finish the core:

- After material is fully set (typically 2 minutes after injection), RapidCore can be cut to the desired shape, using water-cooled diamonds or burs.

FRANÇAIS

RapidCore MiniMix

Matériaux de reconstruction coronaire en résine composite autopolymérisante

| REF 310127 | 12, blanc | REF 310257 | 36, blanc |
| REF 310128 | 12, contrasté | REF 310258 | 36, contrasté |

Conservation : La réfrigération du produit permet d'allonger sa durée de conservation. Remettre à la température ambiante avant l'usage.

Mode d'emploi:

Pour le remplacement de la dentine et la reconstruction sous-jacente des couronnes et ponts préfabriqués

1. Préparation de la dent:

- Éliminez tout résidu de carie et d'ancien matériau de reconstruction.
- Éliminez toute trace d'eugénol en rinçant à l'éthanol avant de poursuivre.

2. Mordorantage de la dent:

- Fixez l'aiguille à la seringue et exprimez le gel en exerçant une pression lente et constante.
- Appliquez le gel de mordorantage à l'acide phosphorique à 40% Onyx d'abord sur la surface de l'émail puis sur celle de la dentine.
- Rincez après 10 secondes à l'eau et séchez délicatement. La surface doit être humide, mais non brillante.

3. Application de l'agent adhésif:

- Utilisez une résine compatible avec des composites autopolymérisants.

4. Reconstruction coronaire:

- Introduire la cartouche de RapidCore Mini-Mix dans une seringue C-R et retirer le capuchon.
- Fixer l'embout mélangeur à la cartouche.
- Purger et extraire une petite quantité de l'embout pour s'assurer que le mélange et le débit sont appropriés.
- Injecter le matériau dans la dent préparée, en veillant à ce que l'aiguille reste bien logée dans le matériau pendant l'injection, afin de limiter tout risque de vides. La durée de cette opération est de 60 secondes environ.

5. Finition du nécus:

- Une fois le matériau totalement pris (en général 2 minutes après l'injection), on peut couper RapidCore selon la forme désirée, à l'aide de diamants refroidis à l'eau ou de fraises.

PORTUGUES

RapidCore MiniMix

Material de resina de autocura para formação do núcleo dental

| | | | |
|------------|---------------|------------|---------------|
| REF 310126 | 12, natural | REF 310256 | 36, natural |
| REF 310127 | 12, branco | REF 310257 | 36, branco |
| REF 310128 | 12, contraste | REF 310258 | 36, contraste |

Pode utilizar-se refrigeração para prolongar o tempo de conservação. Volte a colocar à temperatura ambiente antes de utilizar.

Indicações de utilização:

Para substituição da dentina e formação sob coroas e pontes pré-fabricadas

1. Prepare o dente:

- Remova toda a caries e o material de restauração antigo.
- Qualquer eugenol presente deve ser enxagado com etanol antes de prosseguir.

2. Grave o dente:

- Fixe a agulha à seringa e prima com uma pressão lenta e constante.
- Aplique gravador Onyx com ácido fosfórico a 40% em gel sobre o esmalte primeiro e depois sobre a dentina.
- Espere 10 segundos, depois enxágue com água e seque com cuidado. A superfície deve estar húmida, mas não brillante.

3. Aplique agente de ligação:

- Use qualquer adesivo compatível com resinas compostas de autocura.

4. Formação do núcleo dental:

- Insira o cartucho RapidCore Mini-Mix em qualquer seringa C-R Syringe e retire a tampa.
- Fixe a cânula misturadora ao cartucho.
- Faça a purga de uma pequena quantidade a partir da extremidade, de modo a garantir uma mistura e fluxo apropriados.
- Injeete o material na preparação, mantendo a agulha no material, para reduzir a probabilidade de ficarem espaços vazios; encha a partir de cima. O tempo de trabalho é de cerca de 60 segundos.

5. Termine o núcleo dental:

- Após o material estar completamente pronto (normalmente 2 minutos após a aplicação), RapidCore pode cortar-se na forma desejada, utilizando brocas ou diamantes arrefecidos com água.

ESPAÑOL

RapidCore MiniMix

Resina compuesta de autocurado para la estratificación del núcleo dental

| | | | |

Almacenamiento: Para alargar la vida útil del producto, se recomienda guardarlo en un recipiente refrigerado. Antes de usar el producto, deberá estar primero a temperatura ambiente.

Instrucciones de uso:

Para la reproducción de dentina y la estratificación bajo coronas y puentes prefabricados

1. Preparación del diente:

- Elimina toda la caries y el material de restauración antiguo.
- Antes de proseguir, se deberá eliminar cualquier resto de eugenol por medio de etanol.

2. Grabado del diente:

- Coloque la aguja sobre la jeringa y apriete suave y firmemente para que salga el producto.
- Aplique el gel grabador Onyx con un 40% de ácido fosfórico sobre las superficies de esmalte primero y, a continuación, sobre la dentina.
- Espere diez segundos, limpíe con agua y seque con cuidado. La superficie debe estar húmeda, pero no brillante.

3. Aplicación del adhesivo:

- Use cualquier adhesivo compatible con resinas composite de autocurado.

4. Estratificación del núcleo dental:

- Introduzca el cartucho RapidCore Mini-Mix en una jeringa C-R y retire el capuchón.
- Coloque la boquilla de mezcla sobre el cartucho.
- Extraiga una cantidad pequeña de la punta para asegurar un mezclado y flujo adecuados.
- Inyecte el material en la preparación, manteniendo la aguja en el material, a fin de disminuir el riesgo de que se produzcan huecos. El tiempo de trabajo es de unos sesenta segundos aproximadamente.

5. Acabado del núcleo:

- Una vez que el material se haya fraguado totalmente (unos 2 minutos después de la aplicación), RapidCore se podrá tallar en la forma deseada, usando fresas o diamantes enfriados con agua.

SVENSKA

RapidCore MiniMix

Självhärmande kompositmaterial till kärnupbyggnad

| | | | |
|------------|--------------|------------|--------------|
| REF 310126 | 12, naturell | REF 310256 | 36, naturell |
| REF 310127 | 12, vit | REF 310257 | 36, vit |
| REF 310128 | 12, kontrast | REF 310258 | 36, kontrast |

Förvaring: Kylskåp kan användas för att förlänga lagringsperioden. Återgå till rumstemperatur innan användning.

Användning:

Tandbensersättning och uppbyggnad under förtillverkade kronor och bryggor.

1. Förbered den tanden:

- Avlägsna alla rötter och gammalt lagningsmaterial.
- Eventuellt eugenol måste sköljas bort med etanol innan du fortsätter.

2. Etsa tanden:

- Fäst nälen till sprutan och tryck ut med ett långsamt, stadigt tryck.
- Applicera Onyx 40% etsgel av fosforsyra, först på emaljen, sedan på tandbenet.
- Vänta i 10 sekunder, skölj med vatten och torka försiktigt. Ytan ska vara luktig, men inte glänsa.

3. Applicera bindemedlet:

- Använd ett medel som är kompatibel med självhärmande komposit.

4. Bygga upp kärnan:

- Stick in patronen RapidCore Mini-Mix i valfri C-R®-spruta och ta bort locket.

- Fäst bländningsmunstycket vid patronen.

- Spruta ut en liten mängd ur spetsen för att säkerställa att bländningen och flödet är rätt.
- Injicer materialet i preparationen, genom att hålla nälen inbäddad i materialet för att minska risken att det bildas torrum, tills nedfrån och upp. Bearbetningstiden är ungefär 60 sekunder.

5. Avsluta kärnan:

- Efter att materialet har helt härdat (vanligtvis 2 minuter efter injektionen) kan RapidCore putsas till önskad form, med vattenkylda diamant eller borrar.

ITALIANO

RapidCore MiniMix

Materiale di ricostruzione del nucleo del dente, resine composite autopolimerizzanti

| | | | |
|------------|---------------|------------|---------------|
| REF 310126 | 12, naturale | REF 310256 | 36, naturale |
| REF 310127 | 12, bianco | REF 310257 | 36, bianco |
| REF 310128 | 12, contrasto | REF 310258 | 36, contrasto |

Conservazione: La conservazione a temperature inferiori può essere utilizzata per allungare il periodo di validità dei prodotti. Prima dell'uso, riportare i prodotti a temperature ambiente.

Indicazioni per l'uso:

Per la sostituzione della dentina e la ricostruzione di corone e ponti prefabbricati

1. Preparazione del dente:

- Rimuovere tutto il materiale in decomposizione e il vecchio materiale ricostruttivo.
- Prima di procedure, sciaccquare via tutto l'eugenolo eventualmente presente con etanolo.

2. Incisione del dente:

3. Applicazione dell'agente legante:

- Utilizzare qualsiasi agente compatibile con le resine composite autopolimerizzanti.

4. Ricostruzione del core:

- Inserire la cartuccia RapidCore Mini-Mix in una delle siringhe C-R e rimuovere il tappo.
- Attaccare alla cartuccia un ugello miscelante.

- Far uscire una piccola quantità di materiale dalla punta dell'ago per assicurare una idonea miscelazione e un corretto flusso.
- Iniettare il materiale nella preparazione, assicurandosi che l'ago sia ben inserito nel materiale per ridurre la possibilità di formazione di spazi vuoti; riempire dal basso verso l'alto. Il tempo di lavorazione è di circa 60 secondi.

5. Finitura del core:

- Una volta che il materiale è pronto (solitamente 2 minuti dopo l'iniezione), RapidCore può essere tagliato nella forma desiderata utilizzando diamanti raffreddati con acqua o frese.

NEDERLANDS

RapidCore MiniMix

Stompoppbouwmateriaal van zelfhardend komposit

| | | | |
|------------|-------------------|------------|---------------|
| REF 310126 | 12, dentinfarben | REF 310256 | 36, naturlijk |
| REF 310127 | 12, wit | REF 310257 | 36, wit |

Bewaren: De houdbaarheid kan worden verlengd door het materiaal in de koelkast te bewaren. Laat het materiaal wel voor gebruik op kamertemperatuur komen.

Indicaties voor gebruik:

Voor vervanging en opbouw van dentine onder geprefabriceerde kronen en bruggen

1. Het voorbereiden van de tand:

- Verwijder alle tandrot en oud vul- en ander materiaal.
- Eventueel aanwezige eugenol moet eerst worden weggespoeld met ethanol.

2. Etsen van de tand:

- Bevestig de naald aan de spuit en duw deze langzaam en gelijkmataig leeg.
- Breng Onyx stsgel op 40% fosforzuur eerst op het glazuur en vervolgens op het dentine aan.
- Wacht 10 seconden en spoel dan voorzichtig met water. Het oppervlak moet vochtig zijn, maar niet glimmen.

3. Een adhesief aanbrengen:

- Kies een middel dat compatibel is met zelfhardende composieten.

4. Het opbouwen van de kern:

- Breng de RapidCore Mini-Mix patroon in een hulven som helst C-R sprøjte, og fjern hætten.
- Plaats de mengmond op de patroon.
- Duw een kleine hoeveelheid uit de sputmidom om zeker te stellen dat het materiaal goed is gemengd en goed stroomt.
- Spuit het materiaal in de voorbereide locatie. Houd de naald daarbij in het materiaal om te voorkomen dat holtes ontstaan. Vul de locatie vanaf de bodem omhoog. Dit kan ongeveer 60 seconden duren.
- Bringen Sie das Material in den vorbereiteten Zahn ein. Die Nadelspitze sollte dabei innerhalb des Materials gehalten werden, um Lufteinflüsse zu vermeiden. Füllen Sie von unten nach oben. Die Verarbeitungszeit beträgt etwa 60 Sekunden.

5. De stomp afwerken:

SAFETY DATA SHEET (SDS)

In accordance with Hazard Communication Standard (HCS), 29CFR 1910.1200(g), 2012 revision

SECTION I - PRODUCT/ COMPANY IDENTIFICATION

Product Trade Name: RapidCore™ Self-Cure Composite Resin Core Buildup Material

Synonyms: Self-Cured Core Build-up Restorative

Recommended Use: Dental Material

Part (Item) Number:

REF 310126 Natural, 12 Units

REF 310256 Natural, 36 Units

REF 310127 White, 12 Units

REF 310257 White, 36 Units

REF 310128 Contrast, 12 Units

REF 310258 Contrast, 36 Units

Manufacturer: CENTRIX INC

Address: 770 RIVER ROAD

City, State, Zip: SHELTON, CT 06484

Information Telephone Number: (800) 235 - 5862 (203) 929-5582

Emergency Telephone Number: (800) 235 - 5862

SECTION II - HAZARDS IDENTIFICATION

For potential health hazards: SEE Section 11 below.

No other significant hazards to man or the environment are reasonably foreseen.

SECTION III - COMPOSITION / INFORMATION ON INGREDIENTS

Product Contents: Self-Cured Core Build-up Restorative Material

Hazardous Ingredients: None listed.

Exact % content withheld due to trade secret restrictions.

SECTION IV - FIRST AID MEASURES

Skin: Wash with soap and water.

Ingestion: No harm perceived, however, if large quantities are accidentally swallowed, seek medical attention.

Inhalation: No harm anticipated from materials in quantities as packaged.

Eyes: Flush out with copious amounts of water. Seek medical attention if irritation persists.

SECTION V - FIRE-FIGHTING MEASURES

Suitable extinguishing media: Water contact acceptable.

Forbidden extinguishing media: None.

Special exposure hazards from combustion products: None in quantities as packaged.

Special protection equipment: None.

SECTION VI - ACCIDENTAL RELEASE MEASURES

Personal precautions: Avoid contact of skin or eyes.

Wash hands with soap and water if contact occurs.

Environmental precautions: Dispose in accordance with all local, state, and federal regulations.

Reclaiming methods: Wipe up and clean with soap and water.

SECTION VII - HANDLING AND STORAGE

Handling: Avoid exposure to moisture and light.

Storage: Store at temperatures not exceeding 73° F (23°C).

Other precautions: Avoid exposure to moisture and light.

SECTION VIII - EXPOSURE CONTROLS / PERSONAL PROTECTION

General measures: Avoid prolonged contact with skin; wash with soap and water.

Respiratory protection: Not required.

Skin protection: Not required.

Hands protection: Not required.

Other equipment: Not required.

SECTION IX - PHYSICAL AND CHEMICAL PROPERTIES

Appearance: Part A: White, Natural or Blue Part B: Off-white paste

pH: All Components: Not Applicable.

Odor: Negligible.

Vapor Density (Air=1): Not Applicable.

Specific Gravity (H₂O=1): >1

Auto-Ignition Temperature: Not Applicable.

Reactivity in Water: None.

Oxidizing Properties: None.

Solubility in Water: Virtually insoluble.

Other Data: Not available or none.

SECTION X - STABILITY AND REACTIVITY

Stability: Generally stable unless exposed to elevated temperatures and high intensity light.

Conditions of Instability: Avoid exposure to elevated temperatures and high intensity light.

Incompatibility with Various Substances: None.

Hazardous Decomposition Products: None.

Hazardous Polymerization: Will not occur.

Conditions to Avoid: Elevated temperatures and high intensity light.

SECTION XI - TOXICOLOGICAL INFORMATION

Potential Acute Health Effects: Possibility of skin irritation or sensitization if not washed off promptly.

Potential Chronic Health Effects: Possibility of skin sensitization or irritation upon prolonged or repeated exposure.

Signs and Symptoms of Exposure: Skin/eye irritation.

Medical Conditions Generally Aggravated by Exposure: Previous skin sensitization.

Carcinogenic or Potential Carcinogenic Effects: No ingredient listed as a carcinogen.

Other Potential Health Effects: None known.

SECTION XII - ECOLOGICAL INFORMATION

No ecological damage or impact anticipated upon exposure to the environment as packaged.

SECTION XIII - DISPOSAL CONSIDERATIONS

Waste Disposal: Do not dispose into sink.

Dispose in accordance with all local, state, and federal regulations.

SECTION XIV - TRANSPORT INFORMATION

UN Classification: Not Applicable.

Identification: Not Applicable.

Special Provisions for Transport: Avoid elevated temperatures and high intensity light.

SECTION XV - REGULATORY INFORMATION

U.S. FDA Dental Device: Class II product.

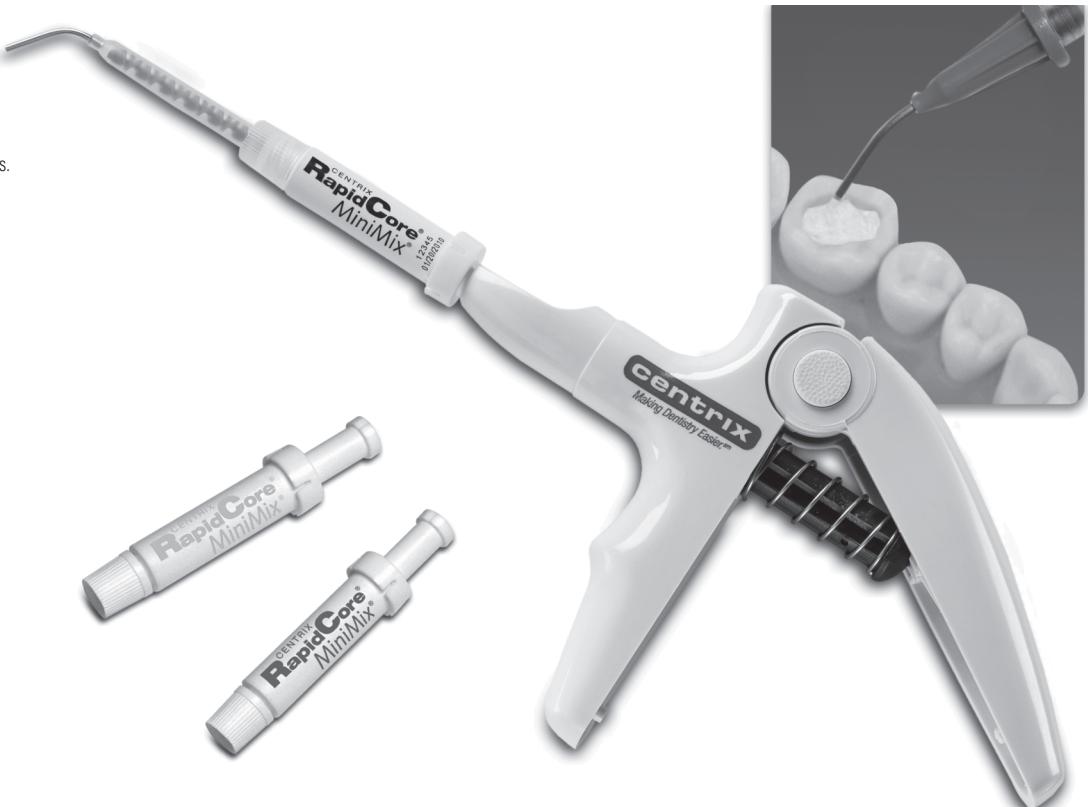

EC Medical Device Directive: Class IIa product.

SECTION XVI - OTHER INFORMATION

Product handling exclusively by dental specialists per instructions for use.

CAUTION

The above information is based on presently available data and to our best knowledge for handling the product under normal conditions. Any use of this product in any way not indicated on this document or using it together with any other process/procedure will be exclusively under the user's responsibility.
