

CENTRIX

FluoroDose Caramel Flavor

Centrix's FluoroDose varnish is now available in delicious Caramel flavor. This 5% sodium fluoride cavity varnish goes on smoothly, without leaving a thick, sticky, or fuzzy feel to the tongue or cheeks as reported with other fluoride varnishes. Its single-use Lollipop package is easy to apply, providing the maximum allowable fluoride dosage and is FDA-cleared for treating dentinal sensitivity.

Each unit contains 1 dose (0.3 mL) of FluoroDose plus 1 Benda Brush applicator, allowing convenient varnish application with a consistent level of fluoride in every application. Simply peel back the cover, dip in the brush, mix, and apply. The varnish is now available in 5 great-tasting flavors: Caramel, Bubble Gum, Mint, Cherry, and Melon.

Dr. Gregori Kurtzman called FluoroDose the best varnish he has used in his office and said, "My adult patients like the Melon and new Caramel flavors, while kids prefer the Bubble Gum flavor. My hygienist and I love the easy application, and it goes on smooth with no sticky or fuzzy feel by the patients."

FluoroDose dries on contact with saliva, eliminating the worry of fluoride ingestion in children. There's no need to maintain a dry field or moisture control when applying. The varnish remains on the tooth for 6 to 8 hours for optimum fluoride uptake.

"FluoroDose helps my adult patients eliminate pain and other issues related to recession and root caries," Dr. Kurtzman said, adding that patients can apply it at home, and it costs less than \$1 per patient, making it an inexpensive practice-builder.
