CENTRIX

FluoroDose Caramel Flavor

Centrix's FluoroDose varnish is now available in a 5th flavor—Caramel. The 5% sodium fluoride cavity varnish goes on smoothly, not sticky, with no “wooly” feeling. With its single-use Lollipop package, FluoroDose is easy to apply, provides the maximum allowed fluoride dosage, and is FDA-cleared for treating dentinal sensitivity.

FluoroDose dries on contact with saliva, eliminating the worry of fluoride ingestion as well as the need to maintain a dry field or moisture control. The varnish will remain on the tooth for 6 to 8 hours for optimum fluoride uptake.

Each unit contains 1 dose (0.3 ml) of FluoroDose plus 1 clean

Benda Brush applicator, allowing the clinician to mix the varnish prior to application and guaranteeing a consistent level of fluoride in every application. Simply peel back the cover, dip in the brush, mix, and apply. The varnish is available in 4 other pre-existing flavors: Bubble Gum, Melon, Cherry, and Mint.
