

CENTRIX **Benda**® Micro Products

The Complete Benda® Micro Family for Precision Tooth Preparation

Precise Application of Today's Dental Materials

Bendable, disposable micro-fiber applicators.

Better applicators for precise delivery, exactly where you want.

BendaMicro Applicators use flock nylon-fibers bonded to our unique bendable handles to enable easy, no drip delivery of even the smallest amount of material... exactly where you want it. With convenient available sizes of Regular, Fine and Extra-Fine, the BendaMicro applicators allow precise placement of bonding agents and etchants into the corners of the deepest preps, or any location where control and precision are required.

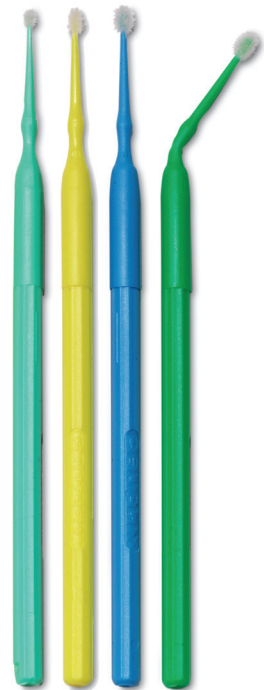

More comfortable, more ergonomic, more economic.

The BendaMicro wide-body handle, with easy-grip edges feels more comfortable to hold and easier to manipulate with gloved fingers. Our exclusive handle helps ensure predictable application of the materials you are placing. Our unique Benda®Microtwin® styles have two brushes on one handle; simply snap them apart for the lowest cost micro applicator.

BendaMatic® Dispenser

Easy, convenient, contaminant-free dispensing.

Our 'one-touch' dispenser presents one applicator at a time. Simply push the button and a BendaMicro is presented upright and ready to use. No cross-contamination of applicators: safer for your patients and reduces contamination of materials – critical in bonding procedures.
