

A BETTER APPROACH TO TOPICAL ANESTHETIC

Rapid Onset. Great Flavors. Easier to Use.

LOLLICAINE IS A FAST-ACTING 20% BENZOCAINE GEL THAT TASTES GREAT!

LolliCaine is designed to provide fast, temporary relief during periodontal curettage, local injections, scaling, root planing and other dental procedures. Available in four flavors (Cherry, Piña Colada, Mint, and Bubble Gum), with no bitter aftertaste.

OUR PACKAGING HELPS CONTROL MATERIAL COSTS

Our unique LolliPack® packaging reduces cross-contamination and eliminates over-dosing waste. Instead of taking extra-large dollops of gel, place two LolliCaine doses on the tray - if you don't need it, return the extra dose to inventory. No waste, no cross contamination. When you do the math, LolliCaine in a single-patient LolliPack is the smart **AND** economical choice.

UNIT-DOSE LOLLIPACK:

- Eliminate unused gel. Place LolliCaine on every tray and if not used it can get wiped clean and go back into inventory
- Easy "take-home" treatment for post-op discomfort
- Eliminates over-dose waste
- Eliminates cross-contamination

Easy, rapid-onset, application

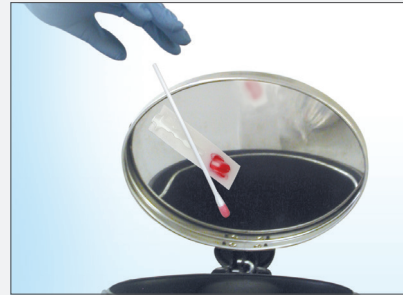

EASIER. FASTER. COSTS CONTROLLED.

1. Dip

2. Apply

3. Toss

SO EASY YOUR PATIENTS CAN DO IT THEMSELVES! GIVE YOUR PATIENTS A DOSE OR TWO FOR HOME CARE.

IDEAL APPLICATIONS

- Prior to local anesthetic injection
- On denture sores
- During rubber dam clamp placement
- During deep scaling
- Home care relief for oral lesions, prosthetics, orthodontic appliances and various dental procedure discomforts

AVAILABLE IN 4 GREAT TASTING FLAVORS!

Cherry, Piña Colada, Mint and Bubble Gum.
